

QUALITY AND ENVIRONMENT POLICY

Algaher S.A.'s management thinks that, guaranteeing the quality of our products and demonstrating that they are produced with the most absolute respect with the environment are necessary conditions. As well as working looking for the continuous improvement of our process, in order to achieve the maximum operative efficiency and competitiveness and the lower impact on the environment, promoting actions that prevent quality and contamination faults.

The pillars on which our policy is based on are the following ones:

- *Satisfaction of the interested parties, as a guarantee of the present and future success of our organization, focusing on the QUALITY of our products and services as strategic elements.*
- *Commitment with the fulfillment of the requirements of our customers, legal and regulatory ones, and other requirements subscribed by the organization, in the fields of Quality and Environment.*
- *People*, as the most important assets of our company, promoting formative and informative actions to increase the level of competence and the environmental sensitivity.
- Commitment with the continuous study of the market with the purpose of including the most efficient machinery in its Productive Means.
- Commitment with an open and transparent communication among the interested parties.
- The cost of maintaining the pillars of the Quality and Environmental System is under control and decrease annually.

Therefore, we have implemented a **Management System** in accordance with the requirements of the UNE-EN-ISO 9001 y UNE EN ISO 14001 standards, focused on the **Continuous Improvement**, working together to achieve the maximum operative efficiency and competitiveness, and also a lower impact in the environment, promoting actions to prevent quality faults and contamination.

This policy is known, understood and applied by every people who integrate ALGAHER S.A.

Purposes which will be revised annually will be established as well as the Quality and Environmental Policy.
